

**WHY DO SOME
PEOPLE HAVE A LOT
OF MONEY AND
OTHERS DON'T?
DO YOU KNOW?**

1. There are five different factors that explain income inequality.
Link each example of income inequality to the correct factor.

| Example of income inequality | Explaining factor (wealth, social, ...) |
|---|--|
| Family in generation poverty | |
| Wealthy star footballer | |
| Employee without secondary school diploma | |
| Long-term sick person | |
| Marc Coucke | |
| Asylum seeker | |
| Owner of apartment building | |

2. Income inequality varies from country to country and can sometimes take extreme forms. The street interviews cite a few examples of countries. Find three other examples of countries where income inequality (the contrast between wealth and poverty) is extreme and explain why this is the case.

| Example of country | Explanation |
|--------------------|-------------|
| | |
| | |
| | |
